

Advanced Film Solutions: Unique Solutions for Florida Homes

Advanced Film Solutions is Tampa Bay’s Vista and Huper Optik Window Film provider covering the Greater Tampa Bay Region.

The company was founded by Michael Feldman, formerly the National Sales Manager of 3M Window Films. Mr. Feldman retired from 3M after a 33 year career. Advanced Film Solutions mission is to exceed our customers’ requirements in window film technology and unmatched customer service. The unique value proposition of Advanced Film Solutions is to provide Superior Solutions driven by innovation exquisite quality, and products that last a lifetime.

Advanced Film Solutions: Products and Solutions:

VISTA Low Reflective Window Films:

VISTA Window Films are the number one choice for Interior Designers around the world. These Films are designed specifically with the Florida homeowner in mind. Wider 6 foot width films are an automatic with VISTA and we offer more choices in shade levels than any other window film product.

Safety and Security are primary concerns for our clientele. The Vista Window Films have passed the 4.5 LB Missile Test ASTM 1886 for annealed glass and tempered glass. **No other** manufacturer of window films can make this claim. We carry wide-width **Energy Star** rated films so we never have to seam our film. Therefore your larger expanse of windows will have one complete covering that will hold the glass in place while strengthening your window openings against wind storms and forced entry.

VISTA Window Films are 30% less reflective than our LLumar Films. This reduces that “mirror” look on your home from the interior view as well as the exterior view. VISTA Films are warranted for life and this warranty is automatically transferred to the next resident of your home. No other film provider has that capability. Our Vista Window Films enjoy Tax Incentives up to \$500 via the IRS. Information and forms can be obtained at www.windowfilmtaxcredit.com

Huper Optik Nano- Ceramic Window Films:

Solar Control: The Huper 30, 40 and 50 Ceramic Solar Control Films are the most advanced technology window films in the world. These German designed ceramic films offer a level of heat rejection and UV protection that no other film can match. The nano-ceramic materials completely eliminate the reflectivity of your windows. These films meet all **Deed Restrictions** and covenants of

Gated Communities and Home Owner Associations. Wide 6 FT widths are included and these films allow more light into your living space than any metal film. Further, given today's technology, Huper Optik Nano-Ceramic Films **will not interfere with Fiber Optic Lines, cell phones or Satellite transmissions**. In fact Huper Optik Films have 3,000 times less interference than metal or sputtered metal films.

Safety and Security:

The Huper 50 Ceramic 4 and 8 ML Safety and Security Window Films are the finest technologically advanced safety and security film in the industry. Employing the same Nano-Ceramic technology utilized in the solar films, Huper Optik has designed a thicker series of films that will protect glass from shattering and improve your home protection and safety.

The Ceramic 50 allows more light into the home while rejecting far greater amounts of heat than any other window film. Optical clarity is critical for homes with a wide expanse of glass. The Huper 50 is distortion free and your views will never be compromised by shiny glass. Huper Optik is crystal clear and we never have to explain blue hues that alter the ambient light in your home.

Installation:
